

ARHIZ-3

Soil Amendment

Arhiz-3 is a powerful biological solution developed to improve soil microbial diversity and help crops better withstand drought and other environmental stresses. This unique microbial blend enhances soil structure and nutrient cycling, increasing water retention capacity and supporting healthy, resilient plant growth. Formulated with specialized microorganisms and microalgae, **Arhiz-3** builds a thriving rhizosphere ecosystem that strengthens root systems, improves nutrient uptake, and supports long-term soil health.

Arhiz-3 Benefits:

- ✓ Enhances drought tolerance and abiotic stress resistance
- ✓ Improves soil retention and moisture availability
- ✓ Promotes root zone health and total plant biomass
- ✓ Supports a balanced soil microbiome for sustainable farming

General Recommendation:

Application rate is 1 to 2 quarts per acre.
Dosage will vary on the specific crop and crop needs.
