

Carbon – Rich Blend for Soil Health

C Element™-AN is an advanced liquid formulation designed to increase soil carbon, stimulate microbial activity, and enhance plant vigor. It features a powerful blend of carbon sources, including biochar, fulvic and humic acids, molasses, and kelp extract, plus essential amino acids to support nutrient uptake and soil health. The addition of microbial support helps drive biological nitrogen fixation and reinforces long-term soil regeneration.

C Element™-AN Benefits:

- ✓ Boosts soil carbon levels
- ✓ Improves beneficial microbial activity
- ✓ Supports natural nitrogen fixation
- ✓ Enhances nutrient uptake and plant vigor
- ✓ Improves root development

DOSAGE

1.5 quarts per acre.
Keep agitated while in use.
Must use entire diluted solution within
24-48 hours.
