

# DEFENSER

## Advanced Natural Insect Control

**Defenser** is an innovative contact and systemic insecticide designed for effective and sustainable crop protection. Its advanced supramolecular technology enhances the absorption and delivery of its active ingredients, ensuring fast-acting insect control. The formula combines thyme oil, a natural plant-based insecticide with broad-spectrum action; zinc, an essential micronutrient that strengthens plant defenses and improves stress tolerance; and sulfur, which provide complementary nutritional benefits. This unique combination delivers powerful pest control while promoting plant health, making **Defenser** an ideal solution for integrated pest management and sustainable farming systems.

### Defenser Benefits:

- ✓ Broad spectrum insect control
- ✓ Natural-based formulation with Thyme oil
- ✓ Strengthens plant defenses with Zinc
- ✓ Suitable for integrated pest management (IPM)

### General Recommendation:

Application rate is 1 to 2 quarts per acre.

Dosage varies based on crop and soil needs.
