

AMIN HYDRO

Biological Amendment

InTerra Bio Amin Hydro is a special blend of biological solution with supramolecular amino acids to enhance plant tolerance to hydric and frost stress, improving resilience under drought, salinity, and extreme temperatures. Formulated with glycine and betaines, plus two unique microorganisms, to strengthen plant and soil health while supporting growth in challenging conditions.

Amin Hydro Benefits:

- ✓ Provides hydric stress and frost tolerance
- ✓ Supports plant and soil health
- ✓ Quick penetration provides zero residue
- ✓ Quick penetration reduces carbon

General Recommendation:

Application rate is 1 to 2 quarts per acre at planting and every 3-4 weeks thereafter during season.
