

AMIN-N

Biological Inoculant

InTerra Bio Amin-N is an advanced biological inoculant that incorporates supramolecular technology to enhance nitrogen fixation and promote both plant and soil health. This innovative solution combines various amino acids with two specially selected microorganism strains to boost nutrient efficiency and growth.

Amin-N Benefits:

- ✓ Enhanced nitrogen fixation
- ✓ Supports plant and soil health
- ✓ Quick penetration supports zero residue
- ✓ Optimized nutrient efficiency
- ✓ Quick penetration reduces carbon footprint

General Recommendation:

Application rate is 1 to 2 quarts per acre.

Dosage will vary on the specific crop and crop needs.
