

DETOX

Biological Amendment

InTerra Bio Detox is a highly concentrated biological amendment formulated with chemical-remediating microbes that work to reclaim and remove undesirable contaminants from agricultural soils and environmental sites, such as herbicides, insecticides, and pesticides.

Detox Benefits:

- ✓ Reclaims soil by breaking down chemical residues
- ✓ Enhances microbial diversity for long-term soil vitality
- ✓ Improves soil health for sustainable farming
- ✓ Compatible with organic and non-organic fertilizers.

General Recommendation:

Application rate is 1 to 2 quarts per acre.

Dosage will vary on the specific crop and crop needs.
