

Lumina

Biological Amendment

InTerra Bio Lumina is a soil-enhancing agricultural amendment featuring a unique blend of *Pseudomonas* and *Bacillus*. These plant growth-promoting rhizobacteria (PGPR) work synergistically to improve soil conditions and provide thermal control. By promoting organic mineralization and enhancing nutrient uptake, **Lumina** supports increased yield in row crops and specialty crops. The microbial diversity within **Lumina** allows it to blend well with both organic and inorganic fertilizers and soil amendments, boosting plant health and productivity across a wide range of crops. **OMRI listed.**

Lumina Benefits:

- ✓ Improves soil conditions
- ✓ Boosts crop yields
- ✓ Supports plant health
- ✓ Microbial diversity enrichment

General Recommendation:

Per crop cycle is 1.5 gal to 2 gal per acre. This dosage can be split in 2 to 4 soil or drip irrigation applications.

For vegetable and row crops, apply 2 quarts/acre 1 week prior to or at planting, repeat application 1/3 of the way and 2/3 of the way into the crop cycle.

The minimum recommended dilution is 1% (1 gal Kyte Gold® / 100-gal water).
