

Pit RX

Waste Inoculant - Biological Amendment

InTerra Bio Pit RX is a sustainable biological composting solution containing a consortia of beneficial microorganisms that accelerates decomposition and reduces crust and odors. It is formulated for decomposing cattle, livestock, and other farm animal waste, converting it into valuable natural and organic fertilizer enriched with beneficial biologicals, including but not limited to nitrogen-fixation organisms. The result is improved waste management efficiency and nutrient-rich compost for agricultural use.

Pit RX Benefits:

- ✓ Accelerates waste decomposition
- ✓ Reduces crust formation in pits and lagoons
- ✓ Minimizes odor from manure and organic waste
- ✓ Converts waste into valuable natural fertilizer
- ✓ Supports nitrogen fixation
- ✓ Improves waste management efficiency

General Recommendation:

To achieve best results, please discuss with your representative the growth development stage of the swine or chicken, if not dealing with cattle.

Application rate depends on system size.

Pond/Pit/Lagoon Water or Sludge Volume in Gallons	Initial Rates	Monthly Maintenance
Less Than 10,000	16 Fl. Oz.	2 to 4 Fl. Oz.
10,000 to 20,000	32 Fl. Oz.	4 to 5 Fl. Oz.
20,000 to 40,000	40 Fl. Oz.	5 to 6 Fl. Oz.
40,000 to 70,000	48 Fl. Oz.	6 to 7 Fl. Oz.
75,000 to 150,000	128 Fl. Oz.	16 to 18 Fl. Oz.
150,000 to 300,000	200 Fl. Oz.	25 to 30 Fl. Oz.
More Than 300,000	Consult with your representative
