

UNLEASH - N

Biological Inoculant

InTerra Bio Unleash-N is a specialized microbial consortia designed to enhance nitrogen and micronutrient fixation, promoting sustainable crop growth. It boosts biological nitrogen fixation, improves root and nodule development, increases yield and protein quality, and enhances soil microbial diversity for healthier, more productive crops.

Unleash-N Benefits:

- ✓ Boosts biological nitrogen fixation
- ✓ Improves root and nodule development
- ✓ Improves yield and protein quality
- ✓ Enhances soil microbial diversity

General Recommendation:

Dose rates are 1 to 2 quarts per acre.

Dosage will vary upon the specific crop and crop needs.
