

UNLEASH - PK

Biological Inoculant

InTerra Bio Unleash-PK is a targeted microbial consortia that unlocks phosphorus, potassium, and essential micronutrients, enhancing nutrient availability and supporting robust root development in a wide range of crops. By naturally mobilizing P and K in the soil, it promotes strong early growth, optimizes flowering and grain fill, and boosts overall yield potential leading to more sustainable production.

Unleash-PK Benefits:

- ✓ Unlocks soil potential
- ✓ Enhances nutrient availability
- ✓ Optimizes growth stages
- ✓ Maximizes yield and sustainability

General Recommendation:

Dose rates are 1 to 2 quarts per acre.

Dosage will vary upon the specific crop and crop needs.
