

UNLEASH

Biological Inoculant

InTerra Bio Unleash is a microorganism consortia specifically developed with a purpose to unlock NPK and micronutrient fixation. Macronutrients provide the foundational elements for plant structure and energy metabolism, while micronutrients act as essential cofactors in enzymatic and regulatory functions. Together, their balanced availability is critical for optimal plant growth, development, and stress resilience.

Unleash Benefits:

- ✓ Unlocks soil potential
- ✓ Supports stronger growth and resilience
- ✓ Improves nutrient uptake and efficiency

General Recommendation:

Dose rates are 1 to 2 quarts per acre.

Dosage will vary upon the specific crop and crop needs.
