

KYTE-GOLD®

Biological Inoculant

Kyte Gold® a premium agricultural product formulated with *Bacillus Chitinosporus* and crustacean meal. This unique blend increases root mass, and plant canopy that enhances light interception, starving weeds of sunlight, improving soil moisture, increases carbon sequestration, and boosts yields. It is 100% biodegradable. **Kyte Gold** also helps with nitrogen fixation and acts as a self-induced response (SIR) elicitor fostering healthier soil ecosystems, making it an excellent choice for sustainable farming.

Kyte Gold® Benefits:

- ✓ Improves root mass and plant canopy
- ✓ Increase crop yields
- ✓ Versatile application for all crops
- ✓ 100% Biodegradable

General Recommendation:

Per crop cycle is 1.5 gal to 2 gal per acre. This dosage can be split in 2 to 4 soil or drip irrigation applications.

For vegetable and row crops, apply 2 quarts/acre 1 week prior to or at planting, repeat application 1/3 of the way and 2/3 of the way into the crop cycle.

The minimum recommended dilution is 1%
(1 gal Kyte Gold® / 100-gal water).
