

# PERISH®

## Systemic, Non-Selective Herbicide

**Perish®** is a systemic, non-selective herbicide powered by essential oils and advanced surfactant components. Designed to eliminate weeds down to the roots, it effectively tackles tough weeds and grasses, including dandelion, crabgrass, ragweed, field bindweed, nutsedges, smut grass, purslane, and chickweed, among many other difficult weeds. Additionally, **Perish** is ideal for organic production and helps reduce carbon footprint. **OMRI listed.**

### Perish® Benefits:

- ✓ Systemic, non-selective herbicide
- ✓ Fast action solution
- ✓ OMRI Listed for use in organic production
- ✓ Cleaner alternative to conventional chemical herbicides

### General Recommendation:

Apply 5% to 15% in 8 to 25 Gal of water (approximately 6 to 20 oz per gallon)
