

Biological Amendment

Seatonic Gold™ is an advanced formulation that combines a concentrated cold-water seaweed extract (*Ascophyllum nodosum*) with a proprietary blend of beneficial rhizobacteria. This product is designed for both organic and conventional production systems and enhances soil chemistry, stimulates microbial activity, and promotes strong, healthy root development.

Seatonic Gold™ Benefits:

- ✓ Enhances root development and vigor
- ✓ Improves soil structure and microbial balance
- ✓ Supports nutrient uptake and stress tolerance
- ✓ Safe for row crops, tree, turf, and organic production

General Recommendation:

Apply to soil at planting 1 quart per acre with sufficient water to ensure penetration to root depth.
Apply 2-3 times foliar throughout the season for vegetable and row crops.
Apply monthly to turf and every other month on fruiting tree crops, maximum 4-5 applications per year.
