

Liquid Seaweed Extract 0-0-5

Seatonic® is a formulation made of a concentrated water-soluble liquid extract from cold water seaweed (*Ascophyllum nodosum*). The properties of *Ascophyllum nodosum* extracts have been demonstrated in several scientific studies. It is recommended for use on all crops, turf and ornamentals. **OMRI listed.**

Seaweed provides various benefits in agriculture, especially for improving crop health, enhancing soil fertility, and boosting overall productivity. These advantages arise from the diverse range of nutrients, bioactive compounds, and natural growth regulators present in seaweed.

Seatonic® Benefits:

- ✓ Higher productivity
- ✓ Reduced environmental impact
- ✓ Long-term soil health
- ✓ Suitable for all crops, turf, and ornamentals
- ✓ Supports plant and soil health

General Recommendation:

Apply 2.5 to 5 pints per acre. 1 to 2 oz. per 1000 sq. ft.

Apply every 14-21 days or as needed throughout the growing season. Spray on plant foliage to the point of runoff.

Apply in the morning or late evening.
