

TERRA Fluid FORAGE FORCE

Liquid Fertilizer 18-3-4

Terrafluid Forage Force™ is an advanced fertilizer solution engineered to optimize forage and hay production in high-performance pastures. Utilizing supramolecular technology, it enhances nutrient stability and availability, while a variable release mechanism ensures both immediate uptake and sustained nutrient delivery over time. Its ultra-concentrated formula, 10 times stronger than conventional fertilizers, delivers superior results with lower application rates, making it both efficient and economical. **Forage Force** supports vigorous growth, improved forage quality, and higher yields with reduced input costs per acre.

Forage Force™ Benefits:

- ✓ Advanced fertilizer formula
- ✓ Variable release action
- ✓ Boosts forage and hay production
- ✓ Universal grass application
- ✓ Ideal for high-performance pastures

General Recommendation:

Allow product to dry fully to ensure product is absorbed before allowing animals to graze.
 Allow up to 14 days prior to baling.

Foliar Application

32 Fl. Oz. per acre in minimum 5 to maximum 50 gallons of water.
 Apply 5 to 7 days after every cutting.
 Apply sooner after every cutting depending on crop needs and conditions.
