

MATURATION

Liquid Fertilizer PK 0-5-14 with Micronutrients

Terrafluid Maturation is an advanced 5-14 PK fertilizer based on phosphorus and potassium, with micronutrients Boron, Manganese, and Zinc. Maturation can be used in fertigation or in foliar applications to provoke proper fruit maturation and coloring. **Terrafluid Maturation** is essential for supporting good maturation, increasing sugar Brix, color, tissue development and growth, and increasing dry matter and fat content.

Maturation Benefits:

- ✓ Improves fruit binding and tissue development
- ✓ Improves fat yield and fruit uniformity
- ✓ Promotes faster and even ripening
- ✓ Helps to increase Brix and pigmentation
- ✓ Enhances tissue firmness and weight
- ✓ Strengthens resistance to plant pathogens

General Recommendation:

	FERTIGATION	FOLIAR APPLICATION
Stone and fruits trees, vegetables, and row crops	13 to 64 us fl oz per acre per application	13 to 64 us fl oz per acre per application
<i>Do not exceed 0.5 gallons per acre in foliar Do not exceed 0.5 gallons per acre in fertigation</i>
