

START

Liquid Fertilizer 3-10-3 with Micronutrients

Terrafluid Start is an advanced 3-10-3 NPK solution composed of supramolecular technology that provides efficient assimilation of nitrogen, phosphorus, and potassium combined with micronutrients Boron, Manganese, Molybdenum, and Zinc. **Start** is ideal for promoting root and root hair formation, especially suitable for seedbeds and after transplanting. **Terrafluid Start** increases the production of auxins, activating the cell division of the crop, causing the development and growth of the roots.

Start Benefits:

- ✓ Rapid root development and early plant establishment
- ✓ Maximum nutrient efficiency
- ✓ Stronger root systems
- ✓ Hormonal boost
- ✓ Reduces carbon footprint
- ✓ Zero residue

General Recommendation:

	FERTIGATION	FOLIAR APPLICATION
Stone and fruits trees, vegetables, and row crops	13 to 64 us fl oz per acre per application	13 to 64 us fl oz per acre per application
<i>Do not exceed 0.5 gallons per acre in foliar Do not exceed 0.5 gallons per acre in fertigation</i>
