

TOMATO MAKER™

Liquid Fertilizer 4-2-6 + Ca(2)

Terrafluid Tomato Maker™ is an advanced 4-2-6 + Ca formula delivering a balanced blend of nitrogen, phosphorus, and potassium, along with calcium to support optimal growth, fruit development, and nutrient absorption in tomatoes, potatoes, and most fruiting vegetables. Perfect for foliar applications, **Tomato Maker** ensures maximum uptake, resulting in healthier plants and higher yields. Ideal for use throughout all major phenological stages, from seedling to harvest, this formulation supports early root development, fruit formation, and ripening. The calcium enriched component aids in preventing common disorders in tomatoes like blossom-end rot.

Tomato Maker™ Benefits:

- ✓ Balanced NPK formula
- ✓ Calcium fortified nutrition
- ✓ Ideal for tomatoes and other nightshade vegetables
- ✓ Optimizes fruit size and quality
- ✓ Reduces blossom-end rot

General Recommendation:

First Phenological Stage:

Application should occur on young plants from seed to transplant. Dilute 5ml (1 tsp) per quart of water. Evenly distribute by foliar spray. Apply once per week for the first 5 weeks or until first fruit appears.

Second and Third Phenological Stage:

Application should occur from first fruit to harvest and during harvest. Dilute 20 ml (4 tsp) per gallon of water. Evenly distribute by foliar spray. Apply once per week during harvest.

Consider an extra application after heavy rain, if product is applied immediately before a rain event.
