

Systemic Fungicide, Bactericide, and Insecticide

Thyme Guard® is an advanced agricultural solution derived from thyme oil extract. It features broad-spectrum properties, acting as a fungicide, bactericide, and insecticide. This product is 100% biodegradable and offers both systemic and contact action. Its innovative molecular structure effectively targets the cell membranes of bacteria and fungi, ensuring efficiency while preventing the development of resistance. It is ideal for organic production. **OMRI listed.**

Thyme Guard® Benefits:

- ✓ Broad-spectrum fungicidal, bactericidal, and insecticidal properties
- ✓ Effective against major plant diseases
- ✓ Controls sucking insects
- ✓ Safe for all food and non-food crops
- ✓ 100% biodegradable

General Recommendation:

Dilute into water at a ratio of 0.125% (1 pint to 100 gal) up to 0.5% (2 qtrs. per 100 gallons). Do not exceed 0.25% (1 qt/100 gals) on newly planted crops or crops with a thin leaf wax layer such as tomatoes and cucurbits.
